L24: Entry 11 of 11   File: USPT   Mar 9, 1982

DOCUMENT-IDENTIFIER: US 4319326 A
TITLE: Electronic cash register system with consolidating means

YEAR ISSUED (ORACLE) (1):
1982

Detailed Description Paragraph Right (13):
Meanwhile, in the ECR 21, in response to the transmission data 56, the CPU 211 designates the jumped address which is stored in the ROM 215, and advances to produce a Z liquidation report in accordance with a program or Z report program stored in the ROM 215 (steps 59 to 61). Namely, the CPU 211 reads out the various data which are stored in the RAM 217 till the last operation by the operator, viz. the data about discount, surcharge, cash, check, charge, receipt, disbursement, refund, goods return, non-sale account or the like, and supplies the printer 213 with such various data to produce a Z report as shown in FIG. 7. The CPU 211 further instructs the printer 213 to produce a printout of the machine number of the ECR 21 and the report number, and clears the data stored in respective storage areas of RAM 217, thus completing its series of operations.
